

STATION CREW BRIEF

01 INTRANET ACCESS

The crew-deck intranet runs on the MERIDIAN station network. All crew share a single default station account — personal accounts are provisioned by station operations and are not available on this node.

shared account
password

crew
meridian-1977

Change the shared password once personal accounts are provisioned.

02 SERVICES ON THE DECK

- Crew messenger (see intranet dashboard)
- Life-support telemetry bus
- Records bridge to the MERIDIAN access controller — registered relay devices only

03 SUPPORT

Raise issues on the crew messenger. Station operations monitors the deck through the records bridge; do not share relay endpoints outside the crew.
